Newsletter Spring 2010

Comfortis chewable tablets rapidly kill fleas and are indicated for the treatment, prevention and control of flea infestations on dogs and for the control of flea allergy dermatitis for one month following administration.

Itchy Ears: Otitis Externa.

What:

This is a disease where your dog's ears become infected and swollen. Because the ear canals are dark and warm, they get easily infected with bacteria and yeasts.

Causes:

Parasites, allergies and foreign objects (grass seeds etc.)
Some dogs are more prone to it due to breed (Shar-pei, Cocker spaniel) and dogs that spend a lot of time exposed to grass and water might be more prone. Food allergy can also be a contributing factor, especially if your dog has one ear that is constantly itchy. If so, it's time to look at a diet change!

100% NATURAL NEW ZEALAND PET NUTRITION

ZiwiPeak is a low allergen, 'real meat' New Zealand made diet that has been formulated to mirror a diet that your dog would find hunting in the wild.

It contains all essential vitamins and minerals to help keep your dog healthy. ZiwiPeak is made from natural ingredients with no added colours, salt, sugars or artificial preservatives.

Pet Corrector.

Is your dog jumping up on you, barking, chewing the furniture, aggressive or stealing food? Then we have the solution for you:

The Pet Corrector emits a harmless hiss of air which mimics the sounds made by snakes, insects and birds such as geese, which use their hiss sound to drive off predators and our domesticated pets have an instinctive sensitivity to this sound.

There is a detailed training guide included, with helpful training tips and key dos and don'ts. It is important that the Pet Corrector is used responsibly and that alternative desirable behaviors are rewarded.
