Summer 2010

Home Feeding Over Christmas and The New Year...

The festive season is upon us! And as many of you may have discovered, a lot of the catteries in the Wellington area are already fully booked! If you can't find anyone to look after your beloved pets, while your holidaying in the sun, WE CAN POSSIBLY HELP :)

A few of the Vet Nurses here are offering a home feeding service over X-mas and the New Year to people living in their local areas.

This service includes not only feeding your cat but medicating if necessary, changing of litter trays and lots of free cuddles!! We will also water plants, collect mail and if you have gold fish we will feed them free of charge too.

Whether it be you can't find a cattery that can house your cat, or perhaps you would just prefer to keep your cat in the comfort of their own home.

Give us a call and ask about 'Home-Feeding' to find out if we can help!!

Special points of interest:

- Christmas & New Year Home-Feeding Service.
- Fun in the Wadestown Cattery!
- Exclusive Facebook Specials.
- Monthly Specials

Kitty Fun in the Cattery

Here at the Wadestown Cattery we try to make it as fun and inviting for our fluffy visitors as we can. We have playhouses, cat tunnels, scratching posts, toys and more... Some of our

stayers that live close by enjoy their time here so much that we have caught them visiting the cattery when they are not even staying!!

If you are considering putting your cat into a

cattery, feel free to book in a free tour and check out what we have to offer!! You can also visit our website at www.wadestownvet.co.nz for photos & prices.

'Jack' one of our many regulars coming back to visit the cattery all by himself

Exclusive Facebook Specials!!

We have recently made a Wadestown Vet Clinic and Cattery facebook page.

By likeing our facebook page you are able to get specials that are exclusive to our facebook fans..

Here we update our monthly specials, post photos, keep you updated on our clinic news and you can also post photos of your pet for us to put on our in-store pet mural!!

So like us on facebook and keep up to date on specials, deals and savings.

Monthly Specials!!

Every month we have great sales in store...

So keep an eye out for savings and deals you won't want to miss!!

HILLS SPECIALS

Up to \$20 off specially marked canine and feline hills science diet food bags!

THE ZIWIPEAK ADVANTAGE

ZiwiPeak pet-foods measure up nutritionally because they:

5. Ingredients like NZ mussel, and venison connective tissue are included in ZiwiPeak cuisine products to nutritionally support long-term joint health.

6. Cats cannot manufacture Vitamin A, Niacin (an essential B Vitamin), Arginine (an essential amino acid to build protein) and Taurine. These nutrients are all included in accessible form in ZiwiPeak meat formulas.

4. Because cats hunting in the wild will eat the whole animal or most parts of it and derive the nutritional benefits of doing so, items like the liver, heart, kidneys and stomach lining should also form a small part of a naturally healthy diet.

7. A good number of commercial food products at the cheaper end contain high levels of carbs in the form of low quality grains and grain by-products. ZiwiPeak is free of any preservatives, fillers or grains.

3. Air-drying the product to reduce the moisture and thereby naturally preserving it, then sealing it in an airtight package, is an effective way of retaining the nutrition value of the protein and vitamins for your pet.

8. Many cats are overweight, the most common reason for this is that cats are eating over-large portions of higher carbohydrate foods and being kept cozily inside rather than being outdoors getting the exercise they need to burn off the calories. Nutritionally sound, meat-based diets require less food intake by cats.

1. Cats are strictly carnivores, relying on a predominant meat diet in order to survive. A balanced meat diet that is rich on protein and fat and low in carbohydrates is ideally suited to a cat.

2. In spite of its domestication mainly from the African wildcat, domestic cats continue to thrive on the sort of natural diet they would ingest if they were hunting in the wild.

9. ZiwiPeak cuisine is approved by AAFCO as a nutritious pet-food diet for cats
